

Like so many of you, we here at Midland Plastics have spent the last few days and weeks learning about the coronavirus, and how it is impacting our world. For Midland Plastics that means understanding how it affects our employees, customers and communities, then making the necessary adjustments to our operations.

Currently, Midland Plastics is running at normal capacity, and plans to maintain until such time as we are no longer able or allowed to do so. We will keep you up to date as to any interruptions in our supply chain or unexpected issues arise that may impact to our ability to service your needs. At the moment we are unaware of any immediate issues, but please understand that this would change based on any state or federal mandate, as we will follow all provided guidelines.

EFFECTIVE IMMEDIATELY In response to the COVID-19 Coronavirus, to ensure everyone's safety, effective Monday, March 16th – Friday, April 3rd. Midland Plastics has implemented a “No Visitors Policy” at all 7 locations to minimize “Face to Face” contact, as well as minimizing the travel of our Outside Sales Team.

We will continue to closely monitor the ongoing and everchanging situation, and do all we can to protect you, your family and ours.

Thank You,

Midland Plastics Management
